

**Influence With 1% Iron** is a liquid formulation of natural stress reducing plant hormones, valuable micronutrients and trace elements (including 1% Fe-EDDHA), beneficial microorganisms, organic soil conditioners, and organic fertility supplements. It is a valuable addition to a well-balanced nutrition program for all types of plants.

**Influence With 1% Iron** is compatible with most companion materials as long as the final tank mix remains above pH 5.0. As always, when trying a tank mix for the first time, a sample jar test should be done to ensure full compatibility. This product is not compatible with calcium nitrate; however, sodium nitrate is compatible. The use of additional micronutrients (chelated or not) with Influence in a tank mix is not recommended as it may alter the designed balance of the product.

**Keep out of the reach of children**

**Notice:** It is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result due to factors that are beyond the control of Organic Approach or the seller. The buyer or user shall assume all such risks.

**Warranty Disclaimer:** Organic Approach warrants this product conforms to the description on its label and is reasonably fit for the purposes described on its label. In no event shall Organic Approach or the seller be held liable for any incidental, consequential, or special damages resulting from the use or handling of this product. The exclusive remedy of the buyer or user for all claims shall be the return of the purchase price of the product.

**Contents: 2.5 gallons**

**Net Weight: 23.00 lbs.**

**Description For Use:**

**Influence With 1% Iron** is designed to be an easy to use product that provides a balanced ratio of each ingredient when diluted with water. To retain its original purity keep the container tightly sealed between uses. Dilute only as much concentrate as needed for each use. **Always stir or agitate the concentrate in its container before use to assure the individual ingredients are thoroughly mixed and the final dilution has the proper balance of ingredients.**

**Influence With 1% Iron** is suitable for conventional liquid foliar and irrigation water applications. It does not need to be watered in for efficacy. It is not recommended to use this product through drip tape unless it is filtered through a 200-mesh screen first.

When possible, foliar applications should be made in the morning hours to reduce leaf surface drying time and minimize the potential for encouraging disease activity.

At higher concentrations in solution, this product has the *potential* to stain or tint surfaces, such as concrete walks/drives, fencing, siding, plant foliage, flower petals, etc. Always test a small area when using the product for the first time to determine if there is any coloration the way you wish to use the product. If necessary, reduce the concentration in water until you find the threshold of acceptable coloration for your unique circumstances.

Turf, Fairways, Greens, and Tees		Woody Ornamentals and Vegetative Crops	
Rate per 1,000 sqft	Frequency	Rate per gallon	Frequency
1.75 ounces	once per week	1.25 ounce	once per week
3.50 ounces	every two weeks	2.5 ounces	every two weeks
7.0 ounces	once per month	4.5 ounces	once per month
9.0 ounces	max one-time rate	The best results are always achieved by using lower rates at more frequent intervals.	
Pastures and Forage Crops		Other Applications	
Rate Per Acre	Frequency	Rate per gallon	Frequency
1.75 gallons	per application	Potted Plants: 1.25 oz	every 1-2 weeks
For best results, the grass/crop should be 8" or higher at the time of application.		Transplants: 4.5 oz	foliar and root soak
