

# Gluten-8™

## Pre-Emergent Herbicide For use on Turf and Beds

**Gluten-8** is a Pre-emergent herbicide that provides superior control of crabgrass and other grassy and broadleaf weeds, including dandelions, crabgrass, and clover. It works by releasing organic dipeptides (proteins) into the soil to prevent weed seeds from establishing.

If seeding, apply seed 3 weeks prior or 3 weeks after **Gluten-8** application.

Mix/Application Rate: 32 Ounces **Gluten-8** concentrate in 1.5 to 2 gallons of water treats 1000 sq ft.

### ALWAYS SHAKE, STIR OR AGITATE BEFORE USE

Always add this product last to the spray tank containing the required amount of water for the treatment area.

**Gluten-8** is a minimum risk pesticide compliant with EPA 25b. This product has not been registered by the US Environmental Protection Agency (EPA). ICT Organics represents that this product qualifies from exemption from registration under the federal insecticide, fungicide and rodenticide act. (FIFRA)

Application dates vary according to weather conditions and region. Apply in early spring to established turf grass and beds before weed germination. Late spring application for warm season weeds. 6 to 8 weeks efficacy control.

#### Active Ingredient:

Hydrolyzed Corn Gluten Meal .....	99.81%
Inert Ingredients .....	0.19%
<b>Total .....</b>	<b>100%</b>
Inert Ingredients: Potassium Sorbate	

#### CAUTION: Keep out of reach of children.

Not labeled for use on edible plants or crops.
